Company Profile

Providing Comprehensive Staffing Services

United Staffing Associates is a privately owned full-service staffing company. Headquartered in San Luis Obispo, California, we also have branch locations in Paso Robles, Santa Maria, Oxnard, Visalia, Porterville, California and Las Vegas, Nevada. We are engaged in every aspect of the employment industry, including staffing, hiring, recruiting, human resources, safety training, consulting, skill testing, and more. The industries we serve include office administration, financial operations, customer service, manufacturing, construction, maintenance, landscaping, warehouse and distribution, accounting, production, hospitality, viticulture, labor, medical, legal, information technology, agriculture, and many others.

Company Roots

We began August 19, 2002 from modest accommodations in Templeton, California, but quickly outgrew the space and officially moved our first location to Paso Robles, California the following year. Our quest to raise the bar in the staffing industry quickly resulted in success. With hard work and determination we expanded to six more locations and planted our roots in each. Supporting, residing, and fostering relationships in each community we serve, the slogan “United We Staff” became an anthem we proudly proclaim.

Our Scope

Our diverse and highly skilled workforce consists of approximately 45 in-house employees and nearly 2,000 temporary, seasonal, and executive placements. We offer consultations on a broad spectrum of human resource issues, labor laws, employment topics, and employee services such as interviewing, hiring, training, employee handbooks, and staff management. Our human resource division supports a multitude of various small, medium, and large businesses throughout the regions we serve.

Safety Culture

We care about our environment and are committed to safety, occupational health management, and risk control. With active employee and customer participation, safety training, work site hazard identification, and management and safety program innovation, our persistent efforts to improve upon our safe work environment continue to pay off. We offer free services for training and certifying temporary employees in maintaining a safe workplace, including free forklift training and certification, new employee safety orientations, and on-site safety evaluations. We offer customized consulting in safety, food safety, environmental, regulatory compliance, OSHA certification, First Aid, and CPR, for those businesses that do not require a full-time safety professional on staff.
